📘 Cahier de Charges – Kasbah Trek (World Cup 2030)

1️⃣ Project Title

Kasbah Trek
Mountains, lakes, forests, traditional life special tours for World Cup 2030 visitors.

2️⃣ Project Context

- Morocco is hosting **World Cup 2030**.
- Tourists will mostly visit major cities, but **Beni Mellal – Khénifra** offers natural and cultural attractions.
- The app connects **tourists, guides, and admins**, providing:
  - Verified guides
  - Group tours
  - Booking with **availability check**
  - Online payments
  - Reviews, favorites, and reports

3️⃣ Project Objectives

- Promote **local tourism** for World Cup 2030 visitors.
- Allow **easy booking with availability check**.
- Enable **secure online payments**.
- Collect **reviews and trip reports** for quality and safety.
- Send **email notifications**.
- Admin dashboard to **manage tours, users, reports, and guide verification**.

4️⃣ Users & Roles

Role	Description
Traveler	Tourists who browse tours, book, add favorites, and write reviews.
Guide	Local guides who create tours, manage bookings, and request verification.
Admin	Manages users, guides, tours, reports, and verification badges.

5️⃣ Technologies

- **Backend: Laravel (MVC)**
- **Frontend: Vue.js 3 (TypeScript) + Tailwind CSS + Vite**
- **Database: PostgreSQL**
- **Email Notifications: Laravel Mail / SMTP**
- **Payment: Stripe / PayPal**

- **Version Control: Git / GitHub**

6️⃣ Functional Requirements

Traveler Features

- Register / Login / Logout
- Browse & filter tours (location, category, price, duration, difficulty, verified guides, availability)
- View tour details: images, guide info, badges, ratings
- Book tours (only if spots available)
- Cancel booking
- Add tours to **Favorites**
- Write reviews & rate tours
- Report unsafe or misleading tours
- Receive **email notifications**: booking confirmation/rejection, reminders, report updates

---

Guide Features

- Register / Login / Logout
- Create, update, delete tours
- Upload tour images
- Accept/reject bookings
- View reviews
- Request verification badge
- Receive email notifications

Admin Features

- Manage users & guides
- Manage tours & categories
- Approve/reject guide verification badges
- Review and act on trip reports
- View statistics: total users, bookings, verified guides, reports

---

Core Features

1. **Availability Check** → Prevent overbooking
2. **Payment System** → Online bookings via Stripe or PayPal

3. **Favorites** → Save tours for later
4. **Reviews** → Rate and comment on tours
5. **Trip Reports** → Report unsafe or low-quality tours
6. **Guide Verification** → Trusted guides badge
7. **Email Notifications** → Booking updates, reminders, report feedback

---

7 - UML – Class Diagram (Text Form)

Classes

1. **User** (base)
2. **Traveler** (extends User)
3. **Guide** (extends User)
4. **Admin** (extends User)
5. **Tour**
6. **Booking**
7. **Review**
